

## INTEGRATED BACHELOR'S/MASTER'S PROGRAM STUDENT TEACHING EVALUATION FINAL RESULTS: ELEMENTARY SPRING 2016

### Context

This survey is part of the set of surveys administered at key transitions points in the IB/M program. This survey was administered to the university supervisors of the 39 members of the Spring 2015 IB/M Elementary education cohort.

### Survey Content

- Information about the clinic placement
- Professional characteristics
- General comments/feedback on the student's performance

### Methodology

The survey was administered using Qualtrics, an online survey tool. An email invitation was distributed to the clinic teachers of all of the students participating in internships. The data collection period was during the last two weeks of April, 2016. A total of 45 surveys were completed (response rate = 38/39 = 97%). All references to individuals/placement sites have been omitted to maintain anonymity.

The data are used for two types of reports.

- **Individual-level report.** This report was distributed to the individual student, the clinic teacher, the seminar leader, and the faculty advisor.
- **Program-level report.** This report, which contains aggregate data, was delivered to the academic program.
  - Results are disaggregated across the 8 fields of interest within the Appendices A-H (Elementary, English/Language Arts, History/Social Studies, Mathematics, Music, Science, Special Education, and World Language).

### Key Findings

- Student teachers were rated as making satisfactory progress on 25 out of 27 performance standards, with the majority rated as making outstanding progress, and an average score of 2.7 out of a possible 3.
- All students received a final grade of "A" for this assessment.
- Qualitative feedback indicated that the student teachers were professional, well-prepared, and did a good job of identifying students' strengths and weaknesses. They also excelled at creating a supportive learning environment.
- It was suggested that the student teachers could continue to reach out to parents and community members and engage them more in the learning process.

**Performance Areas**

**For each of the students, the following scale will be used to evaluate the teaching candidate:**

- 3: Student is making outstanding progress by effectively planning/implementing instruction to address this standard.**
- 2: Student is making satisfactory progress by making deliberate attempts to address this standard.**
- 1: Student is not making satisfactory progress and still remains weak in addressing this standard.**
