

Integrated Bachelor's/Master's Program STUDENT TEACHING EVALUATION FINAL RESULTS: SPECIAL EDUCATION SPRING 2016

Context

This survey is part of the set of surveys administered at key transitions points during their first year in the IB/M program. This survey was administered to the clinic supervisors of the 18 members of the Spring 2016 IB/M Special Education cohort.

Survey Content

- Information about the clinic placement
- Professional characteristics
- General comments/feedback on the student's performance

Methodology

The survey was administered using Qualtrics, an online survey tool. An email invitation was distributed to the clinic teachers of all of the students participating in internships. The data collection period was during April of 2016. A total of 18 surveys were completed (response rate = 18/18 = 100%). All references to individuals/placement sites have been omitted to maintain anonymity.

The data are used for two types of reports.

- Individual-level report. This report was distributed to the individual student, the clinic teacher, the seminar leader, and the faculty advisor.
- **Program-level report**. This report, which contains aggregate data, was delivered to the academic program.
 - Disaggregated results are not reported across campuses, due to no or too few students enrolled in this focus area at the campus.

Key Findings

- Across 50 performance standards, the student teachers scored an average of 2.64 out of a possible 3 points.
- Seventeen out of eighteen student teachers received a final grade of A or A- for their clinic placement.
- Qualitative feedback provided by the mentors indicated that the interns excelled in terms of professionalism, instructional planning, and building rapport with students.
- Areas for improvement include professional collaboration and behavioral management.

Performance Areas

For each of the students, the following scale will be used to evaluate the teaching candidate:

- 3 = Student is making outstanding progress by effectively planning/implementing instruction to address this standard.
- 2 = Student is making satisfactory progress by making deliberate attempts to address this standard.
- 1 = Student is not making satisfactory progress and still remains weak in addressing this standard.

N/A = For use only in the mid-term: means "not applicable" because this standard is yet to be covered.
