

SCHOOL PSYCHOLOGY PROGRAM PRACTICUM EVALUATION RESULTS– FALL 2015

During the fall semester of the 2015-2016 school year, School Psychology students participate in practicum experiences throughout a variety of school locations. This report presents the aggregated results of these evaluations across 19 individuals. This placement represented the first program guided practicum setting for 9 out of 19 or 47.37% of students. Some of the highlighted findings of the report are:

Overall Rating

- ✓ *Overall supervisors rated a majority of students, 15(78.95%), as having “Pre-internship Competence” or “Adequate Competence”, while 4 students (21.05%) were rated as “Developing Competence” in the field of school psychology.*

Block 1

- ✓ *A vast majority of students (minimum of 78.95%) received a rating of at least “Developing Competence” in the following areas with all other ratings in these areas resulting from supervisors “Not Observing” the skill:*
 - Student demonstrates knowledge of various theories and methods of assessment, diagnosis, and data collection and evaluation in psychology and education.
 - Student demonstrates knowledge of various methods and models of identifying and measuring response to and effective outcomes of prevention and intervention services
 - Student demonstrates knowledge of dysfunctional behavior or psychopathology to understand and explain human behavior.
- ✓ *The most common skills to for supervisors to report as “Not Observed” with a majority of ratings falling in these areas (84.21% or higher) were:*
 - Student contributes to, implements, and/or evaluates services for crisis prevention, preparation, response, and recovery at the individual, family, and systems levels that take into account diverse needs and characteristics.

Skill Development

using the attached scale, please evaluate the performance and progress of the student you are currently supervising. Specifically, please evaluate his/her level, knowledge, and skill development *at this time*. The ratings should be based on your observation of the student, or reports from students, school staff, and/or parents.

1	Inadequate Competence	Student demonstrates no skill in this area, or the student demonstrates the skill at a level that is ineffective, despite supervision
2	Minimal Competence	Student demonstrates aspects of the skill at a very basic level, and is effective in this area with a significant level of close, direct supervised assistance (i.e., supervisor observing and providing supervision during activity)
3	Developing Competence	Student demonstrates all aspects of the skill, and is effective in this area with frequent close, supervision; direct supervised assistance occasionally needed
4	Adequate Competence	Student demonstrates all aspects of the skill, and is effective in this area with on-going supervision to affirm the student's skill or to provide suggestions to increase the effectiveness of the skill. Direct supervised assistance rarely needed.
5	Pre-internship Competence	Student demonstrates all aspects of the skill and is effective in this area with regular, on-going supervision, but no direct supervised assistance.
NO	Not Observed	Skill not observed/insufficient data to make ratings at this time.

The items are based on the 2010 NASP standards for graduate education of school psychologists (see: http://www.nasponline.org/standards/2010standards/1_Graduate_Preparation.pdf for additional details) and the APA Guidelines and Principles for Accreditation of Programs in Professional Psychology (see <http://www.apa.org/ed/accreditation/about/policies/guiding-principles.pdf>).
